(970) 576.2533
tschehr@concertonetworks.com

Thomas Schehr joined Concerto Networks® in June 2006 as a franchise owner for Fort Collins to Loveland, CO. He brings more than 25 years of Information Technology (IT), engineering and management experience to his position with the company.

Thomas first learned about Concerto Networks through his research of technology franchise opportunities online. Concerto Networks was a fit for Thomas because he had always wanted to own his own business and the franchise opportunity would allow him to not only utilize his technical and business skills, it meant he did not have to do it alone. Thomas was also seeking a business model which would support his high standards for customer service while also allowing him to retain control of his own future. With Concerto Networks he would not only have this opportunity with ongoing support, he would benefit from the growing multi-national brand. He also researched the expanding market of small- and medium-sized business in need of proactive professional technology solutions. The unique business model presented by Concerto Networks and the wide-open opportunity to answer an unmet need convinced Thomas this was not something he could ignore. Thomas began operations of his Concerto Networks franchise in June 2006 after completing training at Concerto Networks headquarters in Downtown San Diego, CA. Thomas looks forward to the opportunity to earn the respect of his customers by delivering consistent high quality support.

Prior to coming on board with Concerto Networks, Thomas spent over 25 years in various technical roles for large and small institutions. Most recently he spent over 7 years as a Senior Staff Engineer for Sun Microsystems, an innovative industry leader in servers, storage, software and services with a focus on network computing. In this role he lead project management efforts and participated in the development and maintenance of key product offerings. Previous to this he held various Senior Engineering positions for companies such as StorageTek Corporation, Bell Atlantic Corporation and IBM. His vast technical background gave Thomas a strong platform and wide exposure to a variety of technologies at various levels from enterprise to small business. Thomas has a Master's degree in Computer Information Systems from the University of Denver in Denver, CO and graduated Magna Cum Laude with a Bachelor of Science degree in Computer Information Systems from Regis University in Denver, CO. Thomas also is veteran of the U.S. Navy.

About Concerto Networks®

Concerto Networks, Inc. is an international franchise business providing professional, consistent-quality computer and Information Technology (IT) solutions to small- and medium-sized businesses (SMBs), serving a critical function for this rapidly growing market. Concerto Networks goes beyond simple troubleshooting and repair, providing the same holistic approach to IT support and management enjoyed by large companies, while offering significant savings and value to SMBs. The company's model is to build an international business technology solutions network with the expertise, processes, systems and support necessary to provide superlative service to SMBs. Franchises are independently owned and operated by experienced professionals equipped with the latest diagnostic hardware and software for providing on-site service.
