## OfficeScreen® Firewall and IPsec VPN Service

Simple, Reliable, Affordable - Network Security & Site-to-Site Connectivity

You want to focus on your business - not on network security - and you don't have money and resources to spare. At the same time, protecting your data against evolving threats is extremely important. Plus, connecting your locations securely to share information and make decisions based on real-time information can be a real competitive advantage.

Iomega can help. The OfficeScreen FW/IPsec VPN service provides cutting-edge network protection and securely connects multiple sites, all covered by 24x7x365 proactive monitoring and support. This solution combines industry-leading hardware with expert management, providing complete peace of mind for a low monthly fee (there are no upfront hardware costs).

With easy plug-and-play setup, state-of-the-art Juniper® Networks security appliances are positioned at the Internet gateway to each office to secure and prioritize IP data, voice and video traffic. Solutions are tailored to each customer's specific office needs and are field-upgradeable for future growth and functionality.

### Benefits include:

- ▶ **Increased Productivity**
  - Securely connect remote offices making them appear local
  - Maximize mission-critical application uptime and performance
- ▶ **Advanced Network Security and Protection**
  - Protect against changing security threats
  - Insure against continually evolving worms and viruses
  - Comply with government regulations (SOX, PCI, HIPAA, GLBA)
- ▶ **Expert Support and Monitoring**
  - 24x7x365 monitoring and troubleshooting
  - Overnight replacement of failed equipment
  - Technical expertise and support at your fingertips
- ▶ **Affordable**
  - No capital expenditures
  - Low monthly fee
  - Eliminate threat of technology obsolescence
- ▶ **Scalable**
  - Field-upgradeable solution makes it simple to grow your business
  - Value-added options let you choose the services you need
  - Compatible with cutting edge technologies such as Voice Over IP (VoIP)

### Value-Added

Web Filtering - Control access to objectionable websites and limit liability

Gateway Anti-Virus\* - Protect remote offices with managed gateway virus/worm defense - keep remote offices secure and prevent them from infecting the rest of the enterprise.

Remote Client - Increase productivity for traveling staff with secure remote access through a simple software client loaded on individual laptops.

## OfficeScreen® SSL VPN Hosted Remote Access Service

Simple, Reliable, Affordable - Remote Access

If remote access to the network is a priority, but you don't have the resources to manage security and performance, iomega can help.

The OfficeScreen® SSL VPN Remote Access solution is a Fortune 500 level service, designed specifically for small and mid-sized businesses, which enables organizations to provide cost-effective remote access, partner extranet services and intranet security. It utilizes SSL as a secure transport mechanism and does not require a client to be deployed on mobile and remote users' computing devices. Little or no changes are required to internal servers.

A low monthly fee provides high performance, high security remote access to network resources through a simple to use virtual workspace, which is accessible by most web browsers. Access to limited resources, as dictated by you, can even be provided to partners or customers, expanding collaboration opportunities.

No capital or labor investment are required. The solution is hardware-inclusive and fully managed by our technical experts.

### Benefits include:

▶ Increased Productivity	<ul style="list-style-type: none"> <li>• Anytime, anywhere remote network access for employees and partners</li> <li>• Focus on your business, not on network security</li> </ul>
▶ Advanced Security and Protection	<ul style="list-style-type: none"> <li>• Encryption protects against fraud and theft</li> <li>• Control access of remote users down to the file level</li> <li>• Comply with government regulations (SOX, PCI, HIPAA, GLBA)</li> </ul>
▶ Affordable	<ul style="list-style-type: none"> <li>• No capital expenditures</li> <li>• Low, predictable monthly fee</li> <li>• Eliminate threat of technology obsolescence</li> </ul>
▶ Expert Support	<ul style="list-style-type: none"> <li>• 24x7 support</li> <li>• Technical expertise and support at your fingertips</li> </ul>
▶ High Performance	<ul style="list-style-type: none"> <li>• Quick and reliable access to complex applications and databases</li> </ul>
▶ Scalable	<ul style="list-style-type: none"> <li>• Adding remote users is simple and allows you to grow your business</li> <li>• Value-added options let you choose services you need</li> </ul>

### Value-Added

VeriSign® Dual Factor Authentication - Provides a second layer of protection through one-time passwords, which are issued by key-chain tokens.

Secure Meeting - A great tool for increasing collaboration and cutting the costs associated with in-person or third-party web-based meetings.
